 - Kencom Bus Terminal
 - Railways Bus Terminal
 - Commercial Bus Terminal
 - Odeon Bus Terminal
 8. Buildings along site
 - August 7th Memorial
 - Maasai Market
 9. Major landmarks like Archives

CLIMATIC ANALYSIS

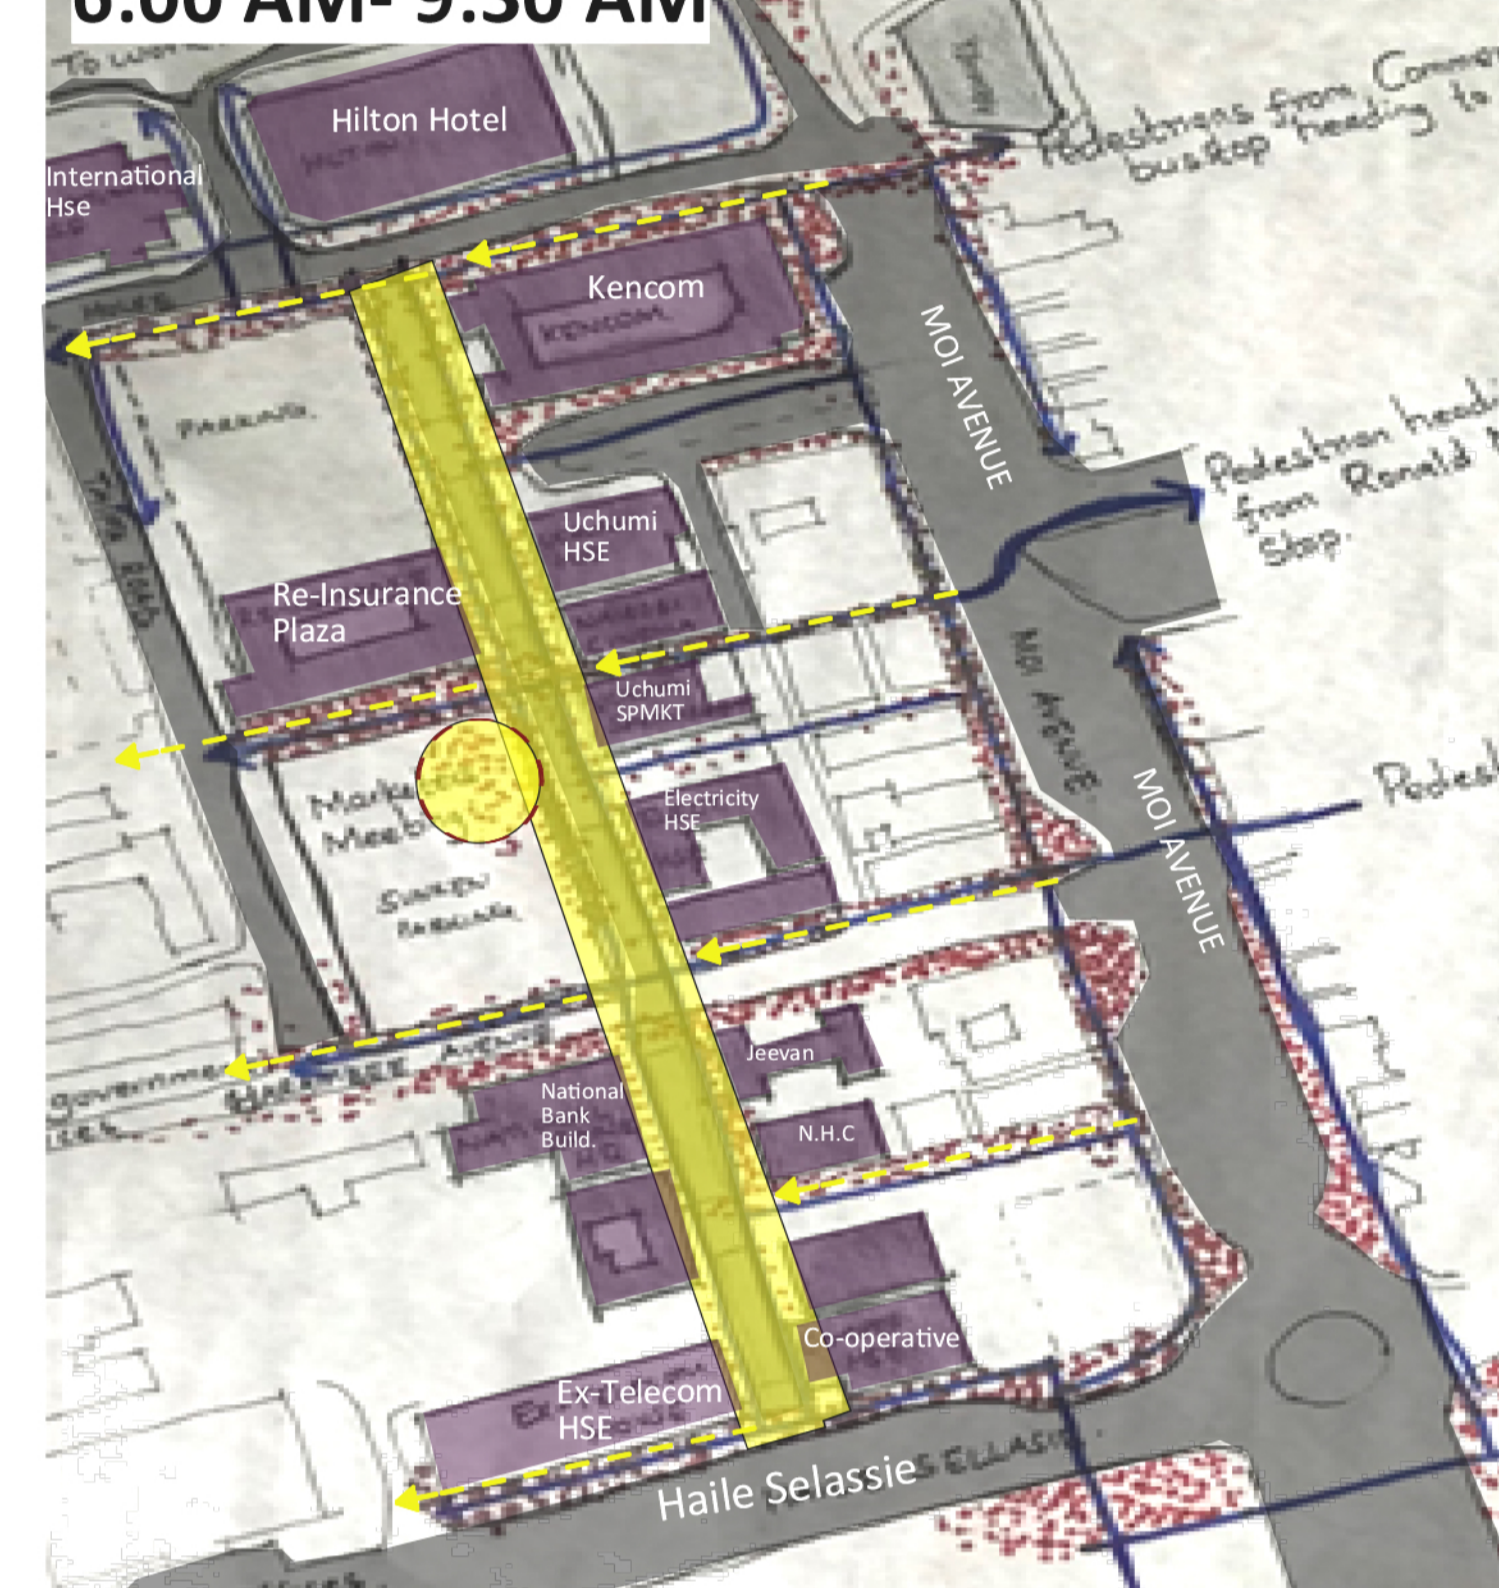

The tall buildings along the street shade the street from the winds and also from the sun creating a micro-climate and natural cool points. The areas next to the sunken car park and private car park are not protected from the harsh western sun thus are the hottest point in the afternoon. The noise levels are not deafening.

PEDESTRIAN TRAFFIC AND ACTIVITIES

Heavy pedestrian traffic. Marketers meet at the area next to the sunken car park. Pedestrian use the street as passage route to work.

6:00 AM- 9:30 AM

11:00 P.M- 4:30 AM

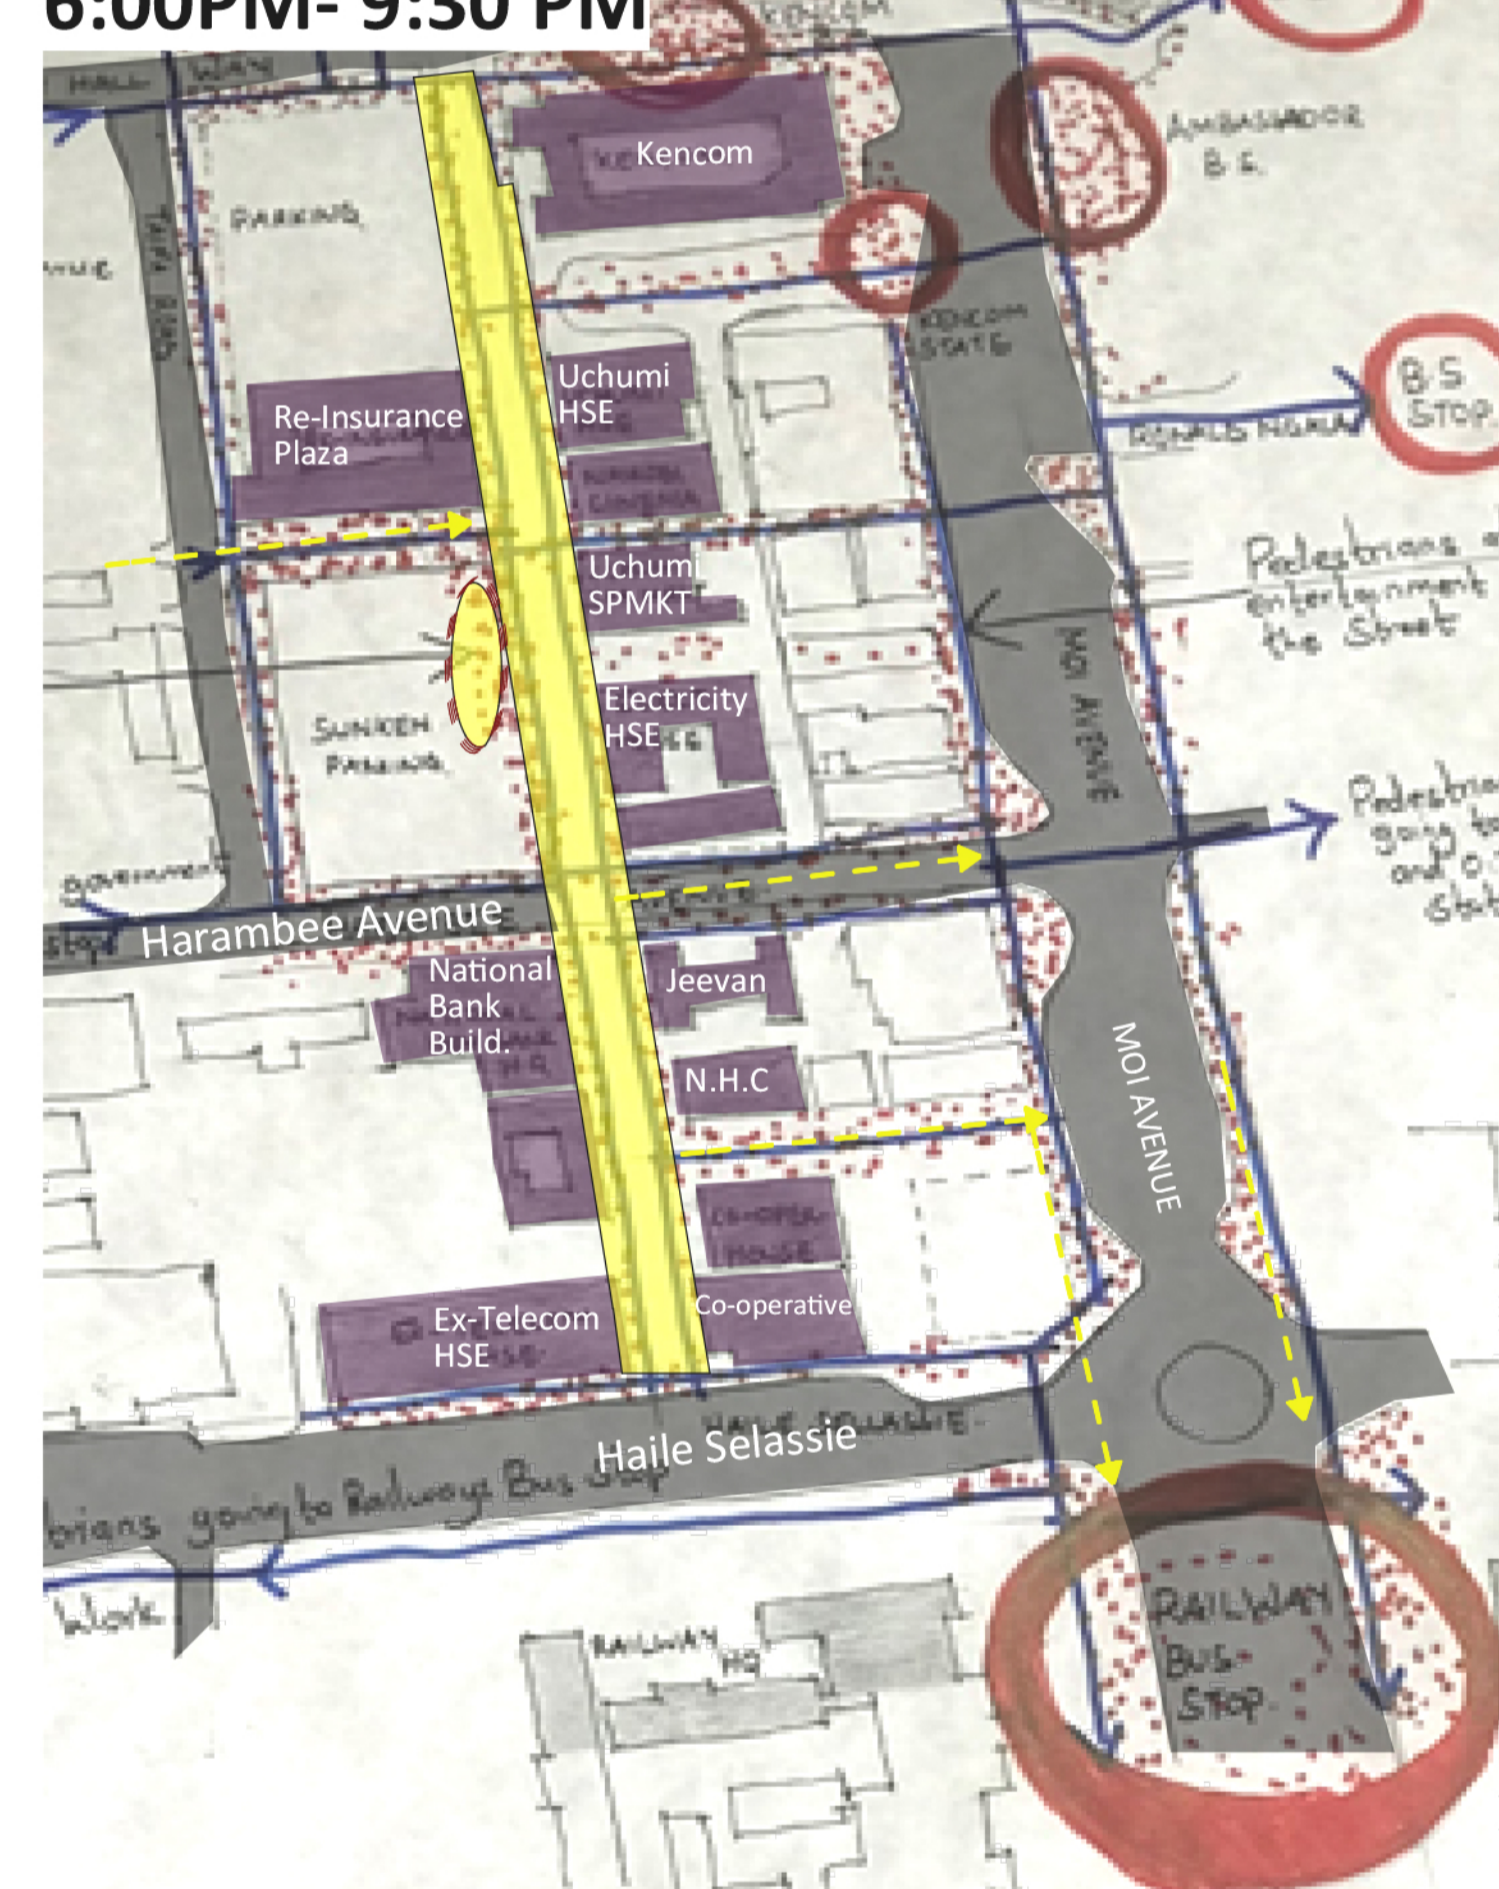

SITE NODES

The site is a major passage route, meeting and recreational space due to its close proximity to major bus terminals, nodes, tourist destinations and iconic buildings. This makes it a viable business hub. Unfortunately, the street does not have a lot of retail shops and restaurants along it.

Heavy pedestrian traffic. Passage for pedestrians going to various bus terminals. Pedestrian waiting for bus fares to go down wait at the walk.

6:00PM- 9:30 PM

Heavy pedestrian traffic. Passage for pedestrians going to eating spaces along Moi Avenue. Pedestrians not going for lunch rest along the street.

12:00 NOON- 2:30 AM

VIEWS

There is exposed positive views to the iconic buildings along the street and in the Central Business District. The open nodes at the Nkrumah Avenue and between Co-operative Building and N.H.C provide views into the busy Moi Avenue
