

STRONG CONNECTION BETWEEN RESTAURANT AND CHILDREN'S PLAY AREA

The two spaces are designed to enable parents to have views into activities of the play area through the use of 1100mm high wall boundary and presence of a sitting area in the restaurant facing the children's play area. This as a result will introduce activities for both parents and their children.

The children's play area also has a wall of 600mm high to fit the children's scale and allow natural surveillance of children as they play. The walls in the children's section are painted with very colourful colours to attract children.
