

WORK AREA

The Work Area design offers a step out of the stage to a more informal meeting place to help develop the arts precinct into a community. The builds all flow into one another. Each work area surrounds a central open air terrace which allows the users to engage with each other, share ideas and encourage one another.

Materials used include:

- Locally sourced clay pressed bricks for walls
- Raised Bamboo Trusses to allow for ventilation
- Bamboo centre open air terrace surrounded by native plants and natural tree shade
- Timber sun shades inbetween doorways.
