

THEATRE POPULAIRE IDEA

The SHOW area

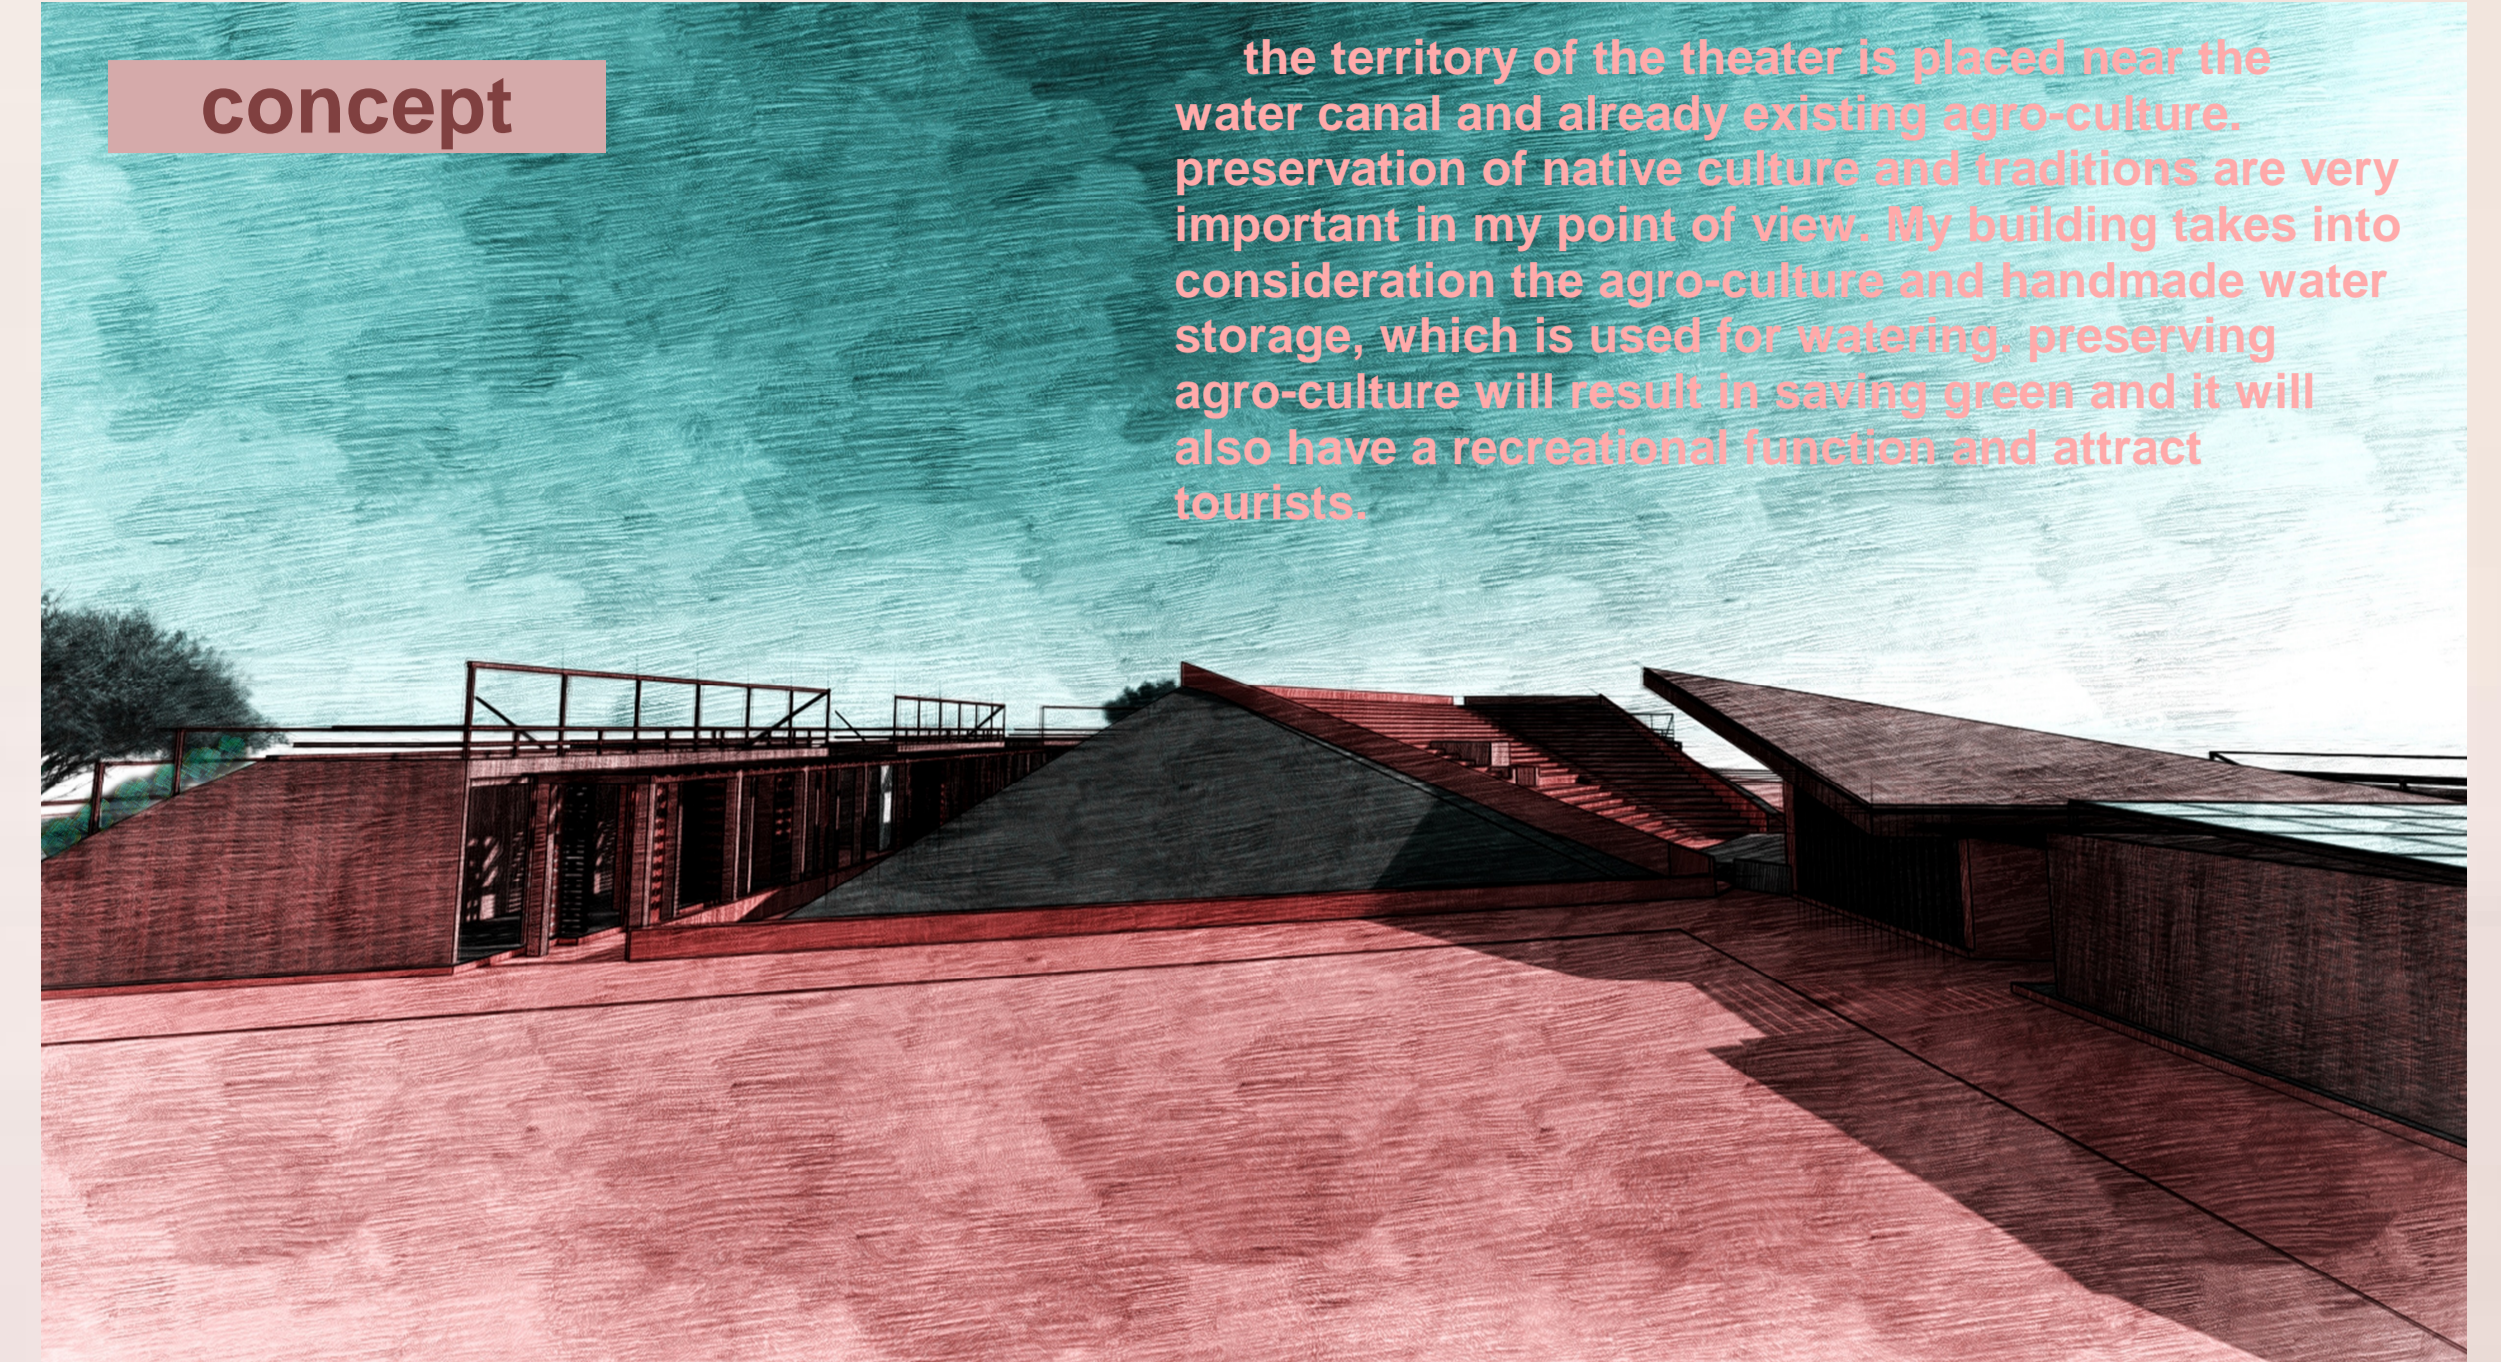

- the auditorium with existing stage,
- stage
- dressing rooms
- room for construction and storage sets
- ...

The LABO area

- Rehearsal Amphitheater

concept

the territory of the theater is placed near the water canal and already existing agro-culture. preservation of native culture and traditions are very important in my point of view. My building takes into consideration the agro-culture and handmade water storage, which is used for watering. preserving agro-culture will result in saving green and it will also have a recreational function and attract tourists.
