

SUBWAY STATION

METRO STATIONS ARE ONE OF THE MOST IMPORTANT LINES IN THE URBAN TRANSMISSION NETWORK BECAUSE THEY ARE LOCATED IN THE BASEMENT AND ARE USED TO TRANSPORT PASSENGERS AROUND THE CITY. BUT CAN IT BE USED AS A SHELTER DURING AN EARTHQUAKE?

GREEN AND SAFE ZONE

IN SOME PARTS OF THE CITY, WE HAVE MANY SCATTERED SPACES THAT ARE USED AS PARKS. THEREFORE, DURING AN EARTHQUAKE, IT IS A SAFE SPACE THAT CAN SAVE LIVES FOR A SHORT OR LONG TIME.

TRIANGLE HOSPITAL AREA

DUE TO THE PRESENCE OF A HOSPITAL COMMUNICATION TRIANGLE ON THE SITE, IT HAS BEEN PROVIDED THAT THE NEED FOR MEDICAL CENTERS WITHIN THE SITE IS LIMITED AND IF NECESSARY, THE PATIENT IS TRANSFERRED TO THE HOSPITAL IN SEVERAL STAGES.

EMPTY SPACE

WELL, WE HAVE A LOT OF VACANT SPACES IN THE CITY AND ON THE OUTSKIRTS OF THE CITY, MOST OF WHICH BELONG TO GOVERNMENT-AFFILIATED OFFICES, THE BOUNDARIES OF WHICH ARE CLOSED. BUT THERE ARE OTHER SPACES ON THE SOUTHERN, EASTERN AND WESTERN MARGINS THAT CAN DEFINE A SAFE SPACE AFTER THE ACCIDENT.

CITY CONTEXT

ABOUT 30-40% OF THE URBAN FABRIC IS OLD, WHICH IS OF LOW QUALITY IN TERMS OF BUILDING STANDARDS AND WILL BE VULNERABLE TO EARTHQUAKES.
