

## MATERIAL PALETTE

Materials present in the second floor fine dining seafood restaurant are polished concrete, emerald green textile, brushed bronze, sea green paint and green marble for bar area.

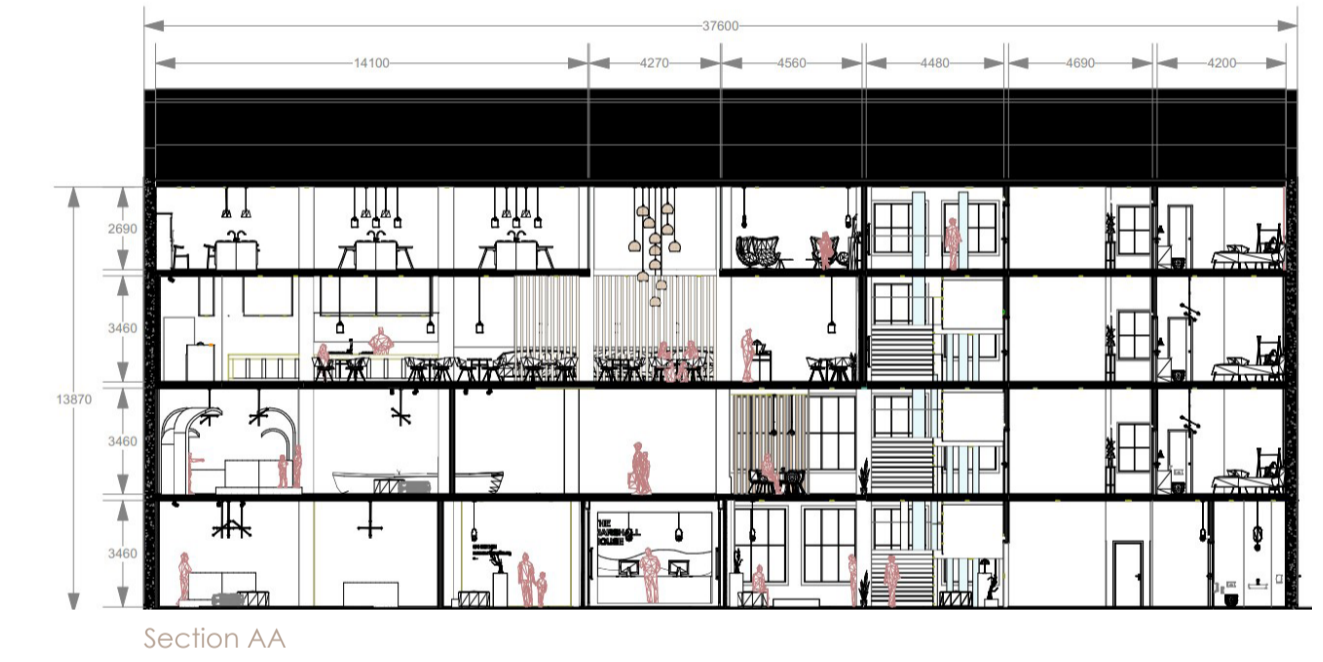

## SECOND FLOOR PROPOSED PLAN

The second floor has a fine dining open kitchen restaurant with space for around 20 - 30 visitors and lounge area for drinks or food. The food offered is inspired by nordic cuisine using fresh local ingredients. Then again we have an entrance for the apartment hotel to the left of the main stairs and toilets by the fire escape. Next to the fire escape will be an area where visitors can leave their belongings.

A large chandelier flows down to the restaurant on the second floor from a void in the third floor.
