

DESIGN PRINCIPLES

ACCEPTANCE

Get the essential needs from the philosophy and its evolution. Doing an acceptable religious building which enhance the pluralism.

Without doing an extravagant, powerful and marginalized religious building only for one particular user group, doing a building with essential needs which can harmonize within the diverse society

UNDERSTANDING

Open structure to showcase interior functions. According to the basic principle of pluralism, showcasing or transparency is important to have mutual understanding with one another. Doing one's religious practice should not be harmful to others. Therefore, showcasing them or create a place to identify their practices with its real values will help to get rid of misunderstanding among each other. Build visual interconnection through architecture in terms of understanding is a vital need to drive a society towards pluralism.

INTER-CONNECTIONS

Cross programming and open plan in ground level. In the past, religious places were a key to community activities. Therefore, it is important to have social engagement within a religious building. Design is going to plant within a diverse society therefore, it is beneficial to provide interconnection, dialogue among people through its program to promote pluralism within the society

Prayer area from the ground level and entrance to the city gallery and resting area at the mosque, which is giving an space to understanding, acceptance and inter-connections

The city gallery and view point at the temple, which is grab people in to the temple and create dialogue with the community and giving opportunity to understand and accept others
