

JASTRZEBIE

CONCEPT

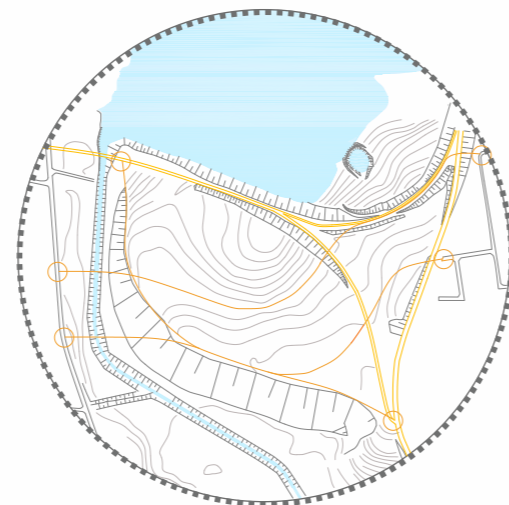

The functional and spatial program covering the heap aims to transform it into a usable space, which will be a place for integration of the local community and people visiting Jastrzębie-Zdrój. Currently, the heap is not developed, it has an unattractive area for visitors. After the development, the area will surely attract crowds of people practicing sports and wanting to rest. The main goal is to create a recreational base that uses elements of the environment. setting out new bicycle routes in the place of the former railway lines and connecting them with the existing "Iron Trail" will enable the continuity of communication in the Śląskie Voivodeship to the border with the Czech Republic.

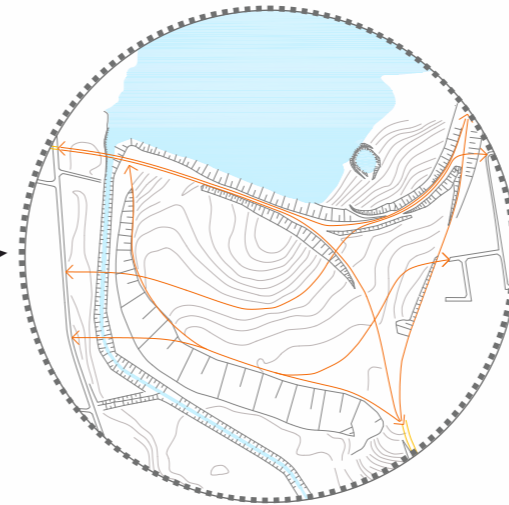

COMPOSITION SCHEME

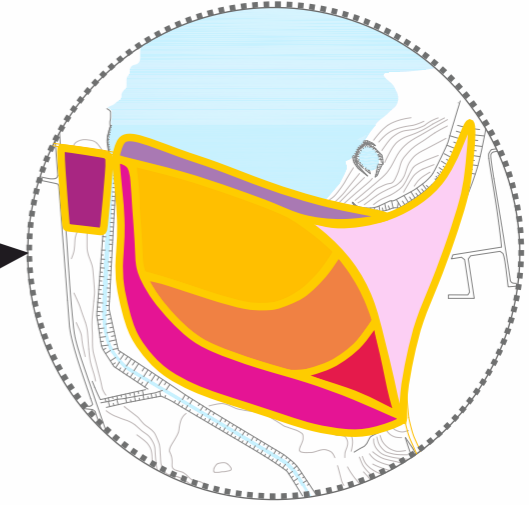

DESIGNATION OF THE TOPOGRAPHY, THE FORMER RAILWAY ROUTE AND CURRENT ROAD ROUTES

RELOCATING OF THE MAIN SHAPE OF THE SPIRIT LEVEL AS A MARKER OF NEW COMMUNICATION
