**Meaning of colors in early childhood**

Influence of colors is most significant till seven years of age. According to research by Marcel Zentner from 2001 named "Preferences for colors and color emotion combinations in early childhood" are most favourite colors in exact order red, pink, blue, yellow and green. Because of gender differences about pink I chose to work with a combination of red, yellow on one side and blue with green on the other side. Every color has its own benefit generally warm colors support activity and cold colors evoke a creative mind.
