

SOFTWOOD PROMOTIONAL CENTRE

ABOUT

Nawala road being an area which is famous for building materials and the site being in the town center gives it a good start from the Promotional center for promoting softwood as a construction material. The old timber hall too being in the town center shows that the center was famous for wood from the old times.

Making the site a public attraction point by creating comforting spaces which will eventually lead them to move through and the building to be exposed. Contrast created through the materiality emphasizes the building from the rest.

Programme

Softwood research centre at Haputale is an intelligent project which touches the innovative and research side of Softwood, while the promotional centre at Nugegoda touches the technological and promotion sense. People who are interested in the new technologies of softwood are formed as groups from the Nugegoda centre and are being directed to the Research Centre at Haputale.

CONTEXT 1:1000
