# 1 Family Villa Interior Design

The subject of this project is the interior design of a family villa in 2 floors, which has about 450 square meters area and it belongs to a 4 member family.

The spaces designed in this project include: a living room, a dining room, a TV room, a kitchen, bedrooms, a private living room, guest room, rest rooms and the entryway.

Some of these spaces have reached the modeling and rendering stage, which you will see in the following images related to the project.

Software : Cad . Photoshop

The interior design of this villa is inspired by Scandinavian Interior architecture style. Our design style in this project is a minimalistic style using a blend of textures and soft hues to make sleek, modern decor feel warm and inviting. It emphasizes clean lines, utility, and simple furnishings that are functional, beautiful, and cozy. Also our source of inspiration ,That is Renowned for their simplicity, utility, and beauty, Scandinavian homes have a pure, pared backed style that is centred around warm functionality, clean lines, flawless craftsmanship and understated elegance. here we have fireplace in the room. Thus, seating arrangements are designed accordingly. Smaller accent chair float closer to the fireplace .

## ■ TV Room And Entryway

the first thing your guests see as they enter your home is your home entryway. This light and bright entryway, makes use of a statement pendant in the center of the room. The chandelier adds great light and interest to the ceiling. Fresh flowers are always nice and they always exude comfort and peace, and many take little effort to maintain. in our entryway we also tried to use bright lights and plants too .
