

The project is a showcase of the natural systems process ,particularly,the right building mode mimicing this side of the **BOUREGREG** riverbank. The project base is towards the end of the lower valley,an excellent natural area that brings together argricultural plain ,a wide arm of the river and some wetlands ,therefore an ecosystem of its own.

The purpose of the Social Center is ,firstly to respond to the needs of the currently marginalized artisanal fishermen community ,create a shelter and a meeting point to the population around it to play-vi-sit-camp-and Learn their passionate inte-rests so to create an independent generated economy.

The main goal is to protect this area and this comunity within a prosperous Struc-ture.
