Project description:

The weekend cottage is a tropical retreat inspired by music, nature, and effortless living. The design harmonizes vibrant, serene aesthetics of tropical architecture with a musical atmosphere, creating a space that feels both uplifting and calming.

Open, airy spaces and large windows invite natural light, sea breeze, and lush views, blurring the boundaries between indoors and outdoors. Natural materials like wood, stone, and rattan bring warmth and texture, while music-inspired patterns and rhythmic elements flow through the interiors, celebrating harmony, movement, and sound.

Every corner is designed to inspire relaxation, creativity, and connection—whether through a quiet morning with nature, an evening of melodies, or moments of togetherness. This weekend cottage is more than a getaway; it is a personal sanctuary where tropical beauty and musical expression come together in perfect harmony.
