

Shaped by Landscape

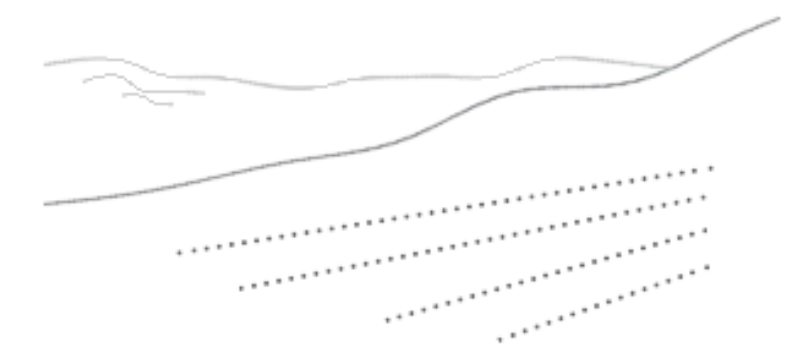

A Rural Community Enterprise

The project reimagines an abandoned rural barn in Lessinia as a collective alpine settlement shaped by terrain, cultivation, and local production. The existing structure becomes a framework for gathering, working, producing, and inhabiting the landscape, preserving the memory of the place while introducing a new productive and social function.

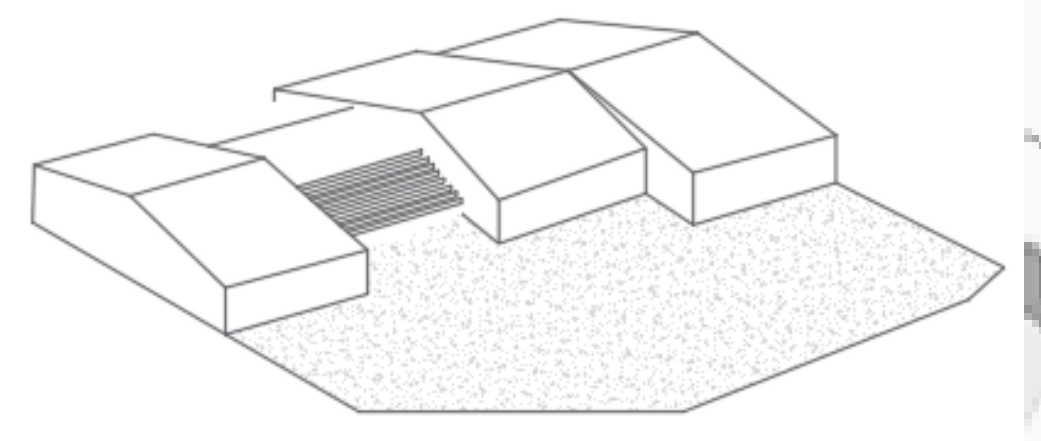

Team: MERIC GULDUOGLU, TOMS MARTINS ŠAKLIS, ELIZABETE DREIMANE
Project: Academic group project, Politecnico di Milano, 2024
Contribution: concept development, landscape strategy, visualisations, physical model, research
