

## MORNING

- Human activity is concentrated at the **ground and plaza levels**
- Residential floors begin to empty and **office occupancy** gradually increases.

## AFTERNOON

- **Informal offices** still remain active
- **Retail floors** become active
- **Community spaces** at various level grow vibrant as people gather and engage there.

## NIGHT

- **Residential floors** become occupied as people return home
- **Informal offices and selected community and amenity zones** at the lower and transitional levels continue to operate to support residents.
