# About Project

reimagines Gotham from a conventional men's billiard venue into a dynamic entertainment lifestyle destination. Rather than serving as a single-purpose space, Gotham is transformed into an immersive environment where leisure, social interaction, and personal experience come together. The design shifts the focus from activity-based use to lifestyle-driven engagement, creating a place where individuals can unwind, connect, and experience moments beyond the ordinary.

## IMPLEMENTATION

To support this transformation, a series of diverse private rooms are introduced, each offering a distinct atmosphere and level of intimacy. These spaces are designed as personal escapes—allowing visitors to step away from the pressures of daily life and immerse themselves in curated forms of entertainment. Through variation in spatial character, lighting, and mood, Gotham becomes more than a destination; it becomes a refuge where people seek comfort, release, and a sense of belonging amidst the rhythm of a busy life.
