NilusForo

NilusForo: An Integrated Aquaculture & Fisheries Hub

Concept

Inspired by seashells along the shore, the design forms 'fluid layered masses' shaped by water movement along the shore. A central pathway acts as the main spine, linking different functional components together, creating an interconnected system that reflects the rhythms of the Nile.

Status: Graduation Project

Year: 2026

Site Location: Rosetta, Egypt

Size: 86,000 m²

Typology: Market, Aquaculture

Supervised by:
Dr. Manal Hassan & Dr. Hisham Bahaa

T.A: Eng. Mirna Wael

Ahmed Mohamed Ragab
